

Nozzles 101

Here at BEC and in partnership with KEG, we understand that continued education is a necessity in our ever-changing industry. The KEG Nozzles 101 training is designed to help YOU grow and develop your jetting equipment operators into more efficient, safe, and knowledgeable personnel.

The Nozzles 101 training is one full day of training broken down into the following:

- 3 hours of class time
- 1 hour for truck demonstrations
- 2 hours in the field

The class includes a breakfast and catered lunch on site.

Be sure to invite your team as classes can hold up to 15 crewmembers per training session. All attendees will receive a certificate of completion at the end of the course.

Included in this course

Comprehensive Industry Training
