PREVENTATIVE MAINTENANCE

Leaf Collector

Technical service and support from your local specialists

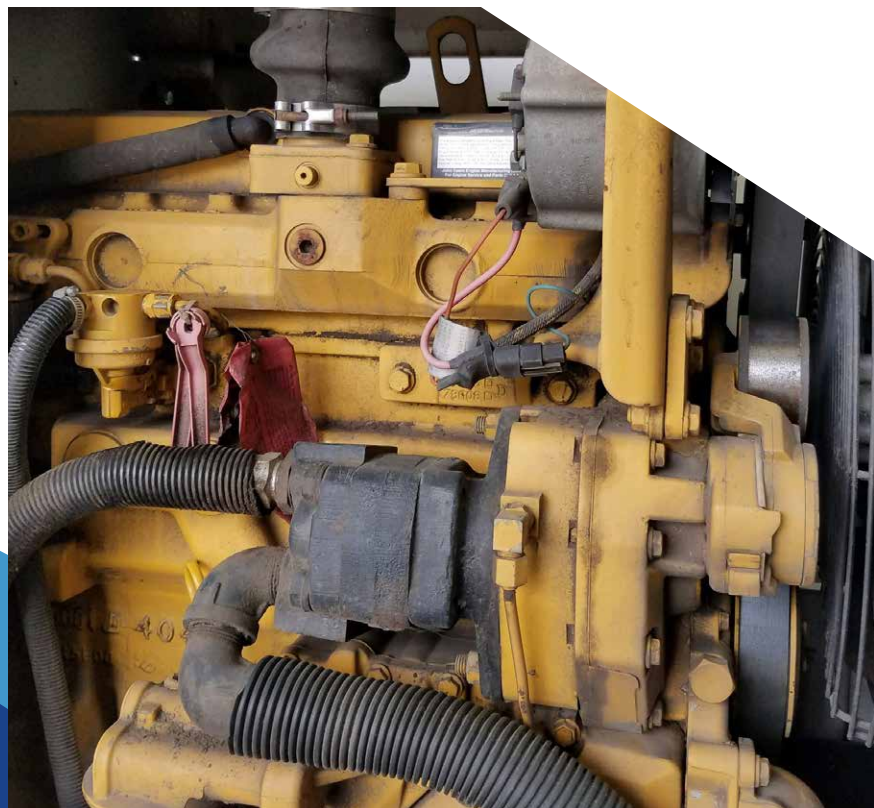

Leaf Collector

Our service experts execute critical inspections on a regular basis and conduct thorough walk-arounds and technical analyses of your equipment.

Preventative maintenance includes:

- Thorough pressure wash
- Top-to-bottom inspection
- Complete engine service
- Fan inspection
- Fan housing & liners inspection
- Check suction hose
- Inspect and service axles
- Inspect and service braking assemblies
- Thoroughly inspect entire hopper
- Complete frame inspection
- Service hydraulic system
- Make any critical adjustments to the clutch
- Inspect and service all electrical functions
- Complete inspection of all operations

Advantages of preventative maintenance:

- Immediate return with operations
- Critical inspections on a regular basis
- Extended equipment life
- Decline in unexpected breakdowns
- Decrease in parts replacement
- Equipment reliability and availability
- Correcting small problems before equipment failure
- Improved resale value
- Documented maintenance schedule
- Greater safety for workers
