

# Multihog<sup>®</sup>

One Machine - One Driver - Endless Applications

### Box Plough MBSP 2440

- Front-mounted snow plough with heavy duty side wings
- Ideal for working in large open spaces such as airports, car parks & commercial areas.
- 180° hydraulic side wings made from heavy duty steel which can be positioned in multiple ways
- Increases clearing efficiency as the snow is contained whilst being moved
- Lateral floating of the blade
- Road-legal Multihog can improve efficiency by clearing one site, raising the plough and driving to another site to start a new winter clearance job
- Plough is operated via joystick within the Multihog cabin, ensuring the operator stays warm and dry
- Various sizes and colours available
- Self-levelling steel skid shoes on the side wings made from steel
- Suitable for use on Multihog MH & MX models
