

Multihog[®]

One Machine - One Driver - Endless Applications

High Volume Submersible Pump MSWP

- High performance pump capable of handling water and waste liquids
- Suitable for our MH & MX tractor ranges
- Diameter of standard hose is 150 mm (6 in)
- Fully adjustable pressure to suit your needs
- High quality, wear-resistant steel volute and impeller
- Capable of pumping 5000 litres/min (1321 US gal/min)
- Pumping performance is not impaired even when pumping at significant distances & depths
- Inconsistencies in the liquid, such as roots and weeds, are shredded by the robust steel volute and impeller
- The Multihog's articulation means it can access hard to reach areas in the event of flooding

Due to our policy of continuous improvement, specifications may change subsequent to publication of this sheet.
