

Multihog[®]

One Machine - One Driver - Endless Applications

Snow Plough

MSP

- Range of heavy duty snow ploughs to suit our full range of tractors
- High grade steel and excellent weld quality for durability and longer life
- Maximum stability and resistance due to the closed profile ladder frame
- Protective rubber elements readjust the plough into clearing position upon contact with an obstacle
- Plough design keeps windscreen snow-free for maximum visibility
- Clearing width varies from 1430 - 2200 mm (56 - 86 in)
- Plough width varies from 1680 - 2570 mm (66 - 101 in)
- Plough height ranges from 640 - 795 mm (25 - 31 in)
- Fully controlled from within Multihog cabin - operator stays warm and dry, and risk of accident or injury is reduced
- Features hydraulic lift, tilt and angle - plough pivots 30°

Due to our policy of continuous improvement, specifications may change subsequent to publication of this sheet.
