One Machine - One Driver - Endless Applications

Watering Arm MWA ET41

- Front-mounted watering arm ideal for municipal and commercial use on our MH/MX tractors
- Designed for the professional irrigation of large areas and high flower decoration
- The arm produces a gentle spray which can water newly planted beds with young plants without the risk of damage
- The arm features a reach of up to 4.1 metres (13.5 ft)
- High casting height of up to 3.6 metres (12 ft)
- Wide swivel range of up to 160°
- Parallelogram-guided arm keeps the watering head at a stable height during extension
- Simple operation via joystick within the Multihog cabin
- Optional hand-lance for manual watering of hard to reach areas on the ground

Due to our policy of continuous improvement, specifications may change subsequent to publication of this sheet.
